

# CLEAN ENERGY & MANUFACTURING INVESTMENTS: VIRGINIA'S SECOND DISTRICT

Since 2022, there has been an energy and manufacturing boom spurring economy-wide benefits across the nation thanks to new and extended clean investments. Many of these tax credits have historically enjoyed bipartisan, widespread support in Congress. It's critical that these credits are maintained to ensure that these generational investments and the revitalizing of American industry can continue.

## Virginia's Second Congressional District

- **\$610 million** invested in the last 2.5 years.
- 95 percent of announced investments—**\$12 billion out of \$12.9 billion**—would be jeopardized if these investments are repealed or modified.
- VA-02 is home to the single largest project in the nation.

## Clean Energy & Manufacturing Investments in Virginia

## Virginia-wide

- **\$3 billion** invested in the state to through December 2024
- Nearly **\$20 billion** more in announced, unspent, and potentially at-risk investments.
- Investments spurred more than **4,000 Virginia clean energy and manufacturing jobs**.

Data on this page comes from multiple sources. All investment data comes from *Rhodium Group* and *MIT CEEPR's Clean Investment Monitor*. All jobs data is from the *Clean Economy Tracker* and jobs numbers provide an overview of jobs across clean energy and manufacturing at active facilities in the state. Due to gaps in publicly available data, some investment and jobs data may be missing from each total and numbers may be greater. Energy price data can be found in reports by *Brattle for ConservAmerica* or *Aurora Energy Research*.

The Center for Climate and Energy Solutions (C2ES) is an independent, nonpartisan, nonprofit organization working to secure a safe and stable climate by accelerating the global transition to net-zero greenhouse gas emissions and a thriving, just, and resilient economy.
